

KODAK Scan Station 710

Outstanding A4 Network Scanner

The KODAK Scan Station 710 won BLI's "Outstanding A4 Network Scanner" award for the Winter 2016 test season for its...

- Faster speeds—the fastest network scanner tested to date.
- Better than average OCR accuracy via searchable PDF.
- Easy to use color touchscreen display that provides access to scan features and custom profiles.
- Lower than average cost per scan.
- Built-in microphone and speaker that record and play back voice messages.

"For organizations looking for a speedy scanner that can also act as a centralized scanning station for sharing files over a network, the KODAK Scan Station 710 should prove more than worthy," said Lisa Reider, BLI's senior product editor for scanners. "Its fast 70-ppm (140 ipm) speeds are virtually unheard of in the network scanner segment. As further proof of its first-rate design, the Scan Station 710 gave a flawless performance during its reliability testing and scanned every media test without any problems. The unit's excellent overall performance, plus the variety of options available for further customization, helped contribute to its BLI Pick status for the Winter 2016 award season."

"BLI is proud to honor the KODAK Scan Station 710 with the BLI Outstanding A4 Network Scanner award for its productive performance, excellent customizability and unique features not typically seen on a network scanner, such as the built-in microphone and speaker. Plus, its straightforward administration tool lets users manage multiple devices from one central location," said Joe Ellerman, BLI's manager of lab operations. "The Scan Station 710 truly raises the bar for network scanners going forward."

About **BLI Pick Awards**

Twice a year with its Pick awards, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests. Its Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, energy efficiency or value.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test, during a portion of which each unit is run at the manufacturer's maximum duty cycle. BLI's durability test is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and value, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability and the best performers qualify as Pick contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
